

Stavros Ditsios CV

Stavrosditsios.Com

The paintings of Stavros Ditsios, are inspired by abstract expressionism, deeply symbolic in seeking answers to basic existential questions. The artist abolishes the realistic form, however keeps the content and transfers to in his work his constant reflections of today's reality. The technology and its dead ends, man in relation to nature, life as a universal extension and the constant change in energy and creation, are some of the issues that are affected in his multileveled work.

It uses the motifs as points of contact with reality while on the other side he abandones any distinctive signs to hang and detach from anything tangible. The overlapping surfaces, the simultaneous use of prints and the use of multiple materials and tools, determine the painter's technique.

Stavros Ditsios was born in Thessaloniki, Greece in 1978. He studied painting in the Academy of Fine Arts of Florence(1997-2001). Amongst his tutors was professor Umberto Borella.

Stavros Ditsios lives and works in Thessaloniki, Greece.
